

lys k Lysin

L-Lysine is a basic, genetically coded amino acid. It is essential in human nutrition.

Symbol

lys k

Molecular formula

C₆H₁₄N₂O₂

Molecular weight

146.19

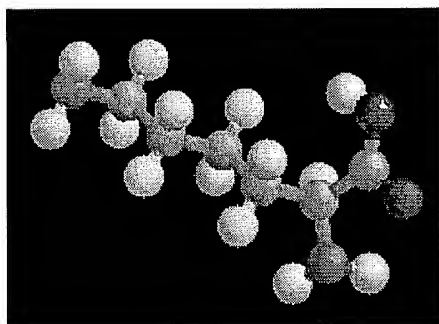

Isoelectric point (pH)

9.59

CAS Registry Number

39665-12-8

3D Molecular Model

If you have installed MIME types for Chemistry for use with the Alchemy mol format, you may click at the 3D model above.
